

**COMPLETELY FOCUSED
ON YOUR COMFORT**

From the moment you walk through the doors of the WOMEN'S IMAGING CENTER at JOINT TOWNSHIP DISTRICT MEMORIAL HOSPITAL, you'll feel the difference. Our expert, caring staff is trained and dedicated to ensuring your privacy, dignity, and comfort. You'll notice that the state-of-the-art facility maintains a quiet, non-clinical atmosphere that instills confidence, but also puts you at ease. The technology at the center is the best in the Region. The physicians and staff are exceptionally skilled and sensitive to the needs of women of all ages.

**UNDERSTANDING YOUR HEALTH
– QUICKLY AND THOROUGHLY**

As the preferred choice for healthcare in the Grand Lake region, we've adopted a philosophy of never compromising on the services and technology we provide

to our patients. That's why we've equipped our WOMEN'S IMAGING CENTER with the most advanced and accurate diagnostic and screening tools available. Our bone density

DEXA-scanner assesses bone health, detecting osteoporosis. We offer top-of-the-line digital mammography with computer-aided detection. If further testing is required, a radiologist will conduct other tests which may include Molecular Breast Imaging (MBI), a test that can aid in diagnosis when the mammogram is inconclusive, a Stereotactic breast biopsy, a digital-image guided test that pinpoints breast abnormalities and obtains tissue samples for diagnosis. Our ultrasound technology – for both breast health and obstetrics – is unsurpassed.

We understand that with any services, you want answers. At the WOMEN'S IMAGING CENTER, you'll receive your diagnostic results the same day the tests are performed. Screening results will be provided as soon as they are available, and always within two weeks. When appropriate, you will meet with a radiologist who specializes in women's imaging to address any concerns. We offer individual patient education, and we'll assist you in accessing any additional resources you may require.

*Your gift to the
WOMEN'S
IMAGING CENTER
is a gift to enhance
women's healthcare
in our community.
