

INTRODUCING URODYNAMIC TESTING

The newest addition to the comprehensive services offered by Grand Lake OB/GYN is Urodynamic Testing — a series of diagnostic tests to evaluate the function of the bladder and urethra. Nearly 70 percent of women battle urinary incontinence at some point in their lives, often struggling with recurring bladder infections, slow or weak urinary stream, and incomplete bladder emptying or frequent urination. Urodynamic Testing provides our experienced physician, Dr. Mitchell Nutt, with the information necessary to diagnose and treat bladder problems appropriately. Dr. Nutt is trained in Urodynamic Testing and a wide range of treatments and surgeries for female incontinence.

IF YOU COULD BENEFIT FROM URODYNAMIC TESTING...

Please call our central office at **419-394-7314** to schedule an appointment.

ABOUT GRAND LAKE OB/GYN

Grand Lake OB/GYN offers women access to a comprehensive staff of medical professionals that includes two OB/GYN physicians, trained in the care of higher-risk pregnancies and many benign gynecologic treatments, and two Nurse Midwives specializing in the general care of women and low risk pregnancies.

Dr. Mitchell Nutt, M.D. is trained in female pelvic floor disease, incontinence and Urodynamic Testing. He also works to treat bladder dysfunction, other forms of pelvic prolapse and a range of women's health problems.

Dr. David Mitchell, M.D. specializes in treating a wide range of women's health problems, including pregnancy-related complications, abnormal uterine bleeding and cervical disease.

Deb Newton and Bridget Heckler, Nurse Midwives, are dedicated to providing a variety of well-woman care and believe in treating patients holistically.
