

COVID-19 Drive-Up Testing

Covid-19 Drive-Up Testing has been moved to the EMS Entrance/Canopy near the JTDMH Emergency Department located off of Hager Street in St. Marys

Patients will drive to the designated parking space across from the EMS/Ambulance entrance off of Hager Street. Signage states to call outpatient registration upon arrival and remain in their vehicle. The patient will be registered over the phone and met shortly after by a qualified laboratory employee to collect the specimen.

Please note--a physician's order is still required to perform testing.

All Covid-19 and respiratory collecting lab orders should present to the drive in testing area. If the patient has additional testing (ie Medical Imaging, Blood), they will have to re-enter the Outpatient entrance of the hospital as a two-step process before or after the drive-in testing. Please advise patients to wear facial coverings to help protect collecting staff.

The new hours for Covid-19 collections are Monday-Friday 9AM-5:30 PM.

Please encourage patients to *present during posted hours.*

After hour collections may not be accommodated.
